## LUBRICANTS

	Part #	LUBRIPLATE		Part #	EZ-TURN
	630AA	NLGI No 1 lubricant and the most popular multipurpose general grease		EZTURN 1LB	EZ Turn is a specialty lubricant/sealant used for fuel and oil line valves & is resistant to high temps.
	130AA140Z (14 ozs)	Is designed for those applications where a grease-type lubricant possessing extremely good water repellence and superior lubrication characteristics is desired. It is recommended for plain bearings, cams, guides, open gears, slides and chassis lubrication and where temperatures do not exceed 170°F.			
	00116 (11 ozs)  Aerosol	LPS 1 is a greaseless lubricant providing a dry, thin, greaseless lubricating film. It resists oil, dust and dirt build-up, while displacing moisture on electrical components. Non-conductive. Safe on paint and most plastics. LPS-1 meets the following specs: Lockheed Martin EPSN G34.031 • Pratt & Whitney Canada CPMC 79255 Rev.C • Rolls Royce Overhaul Process 340, Allied Signal ES-2092, Boeing B737-500 Task 75-31-02-206-01-C00, Bombardier (Canadair) BAMS 569-001, and MIL-C23411A

	<b>Our Part #</b>	<b>LPS PRODUCTS</b>
	00216 (11 ozs)  Aerosol	<b>LPS 2</b> is a non-drying, oily film that provides long lasting lubrication and protects against corrosion on steel parts indoors for up to one year. LPS 2 affords excellent protection for hand/machine tools, too. It does not contain chlorinated solvents or silicones. LPS2 is available in trigger and bulk sizes. Meets Lockheed Martin EPSN G39.04 • Comair • Pratt & Whitney Canada CPMC 79256 Rev. C • UPS M-5100-2780-B, MIL-PRF-16173E Grade 3, MIL-C-81309D Type III, MIL-PRF-16173E, Grade 3, Class 1,472, and MIL-C-23411A.
	00316 (11 ozs)  Aerosol	<b>LPS-3</b> protects metal parts stored indoors for up to two years. LPS3 forms a soft, self-sealing, waxy film that acts as an effective barrier sealing out moisture, acid, dirt, sand, dust and other corrosive elements. LPS3 also provides non-sling lubrication. It is safe to use on most surfaces and does not contain any chlorinated solvents or silicone. LPS-3 is non-conductive and non-staining. LPS-3 meets the following specs; Pratt & Whitney PWA 36604, Pratt & Whitney Canada LCPMC 79133 Rev. D, McDonnell Douglas DMS 2150, Lockheed Martin Heavy Duty CPC 2b, Lockheed Martin EPSN G39.2004, Embraer EMB 120 Brasilia C.P.M.-120/1181 Type A-1, Bombardier De Havilland DHMS C4.12 Type I Grade 3, Boeing BMS-3-23G Type 2, ASTM F-945, Airbus TN A.007.10138 Type I Grade 2, Airbus AIMS 09-08-001, Saab 340 Maintenance Manual, United Technologies USBI 99606-0012, MIL-PRF-16173E Grade 2 Class 1, MIL-C-83933A.
	00322 (20 ozs)  Trigger Pack	
	10013 (13 ozs)  Aerosol	<b>ACF-50</b> , Anti-Corrosion Formula, is a state of the art, anti-corrosion lubricant compound, specifically designed for the Aerospace Industry. It is an ultra, Thin Fluid Compound (TFFC) that actively treats metal using advanced polar bonding technology. ACF-50 actively penetrates and "creeps" into the tightest seams, lap joints, micro cracks, and around rivet heads, displacing moisture and other corrosive fluids (orange juice, coke, coffee, saltwater) in these corrosive prone areas. ACF-50's thin film acts like an "OFF SWITCH" for corrosion remaining effective for up to 24 months.
		<b>ACF-50</b> , Anti-Corrosion Formula, is also available in(US) quantity's
	<b>Our Part #</b> SH42323450 (13 ozs)	<b>VASELINE</b>  Vaseline petroleum jelly, skin protection

## PENETRANTS

	<b>Our Part Number</b>	<b>MOUSEMILK</b>		<b>Part #</b>	<b>AEROKROIL</b>
	MOUSEMILK80Z (8 Fluid ozs)  &  MOUSEMILK320Z (32 Fluid ozs)	Mousemilk is a penetrating oil that is used for everything from freeing stuck turbochargers to disassembling jet engines. Mousemilk (Green) meets Boeing D6-17484, D6-17487 and ASTM		AEROKROIL130Z  (13 ozs Aerosol can)	AeroKroil loosen frozen metal parts with ease. It is an industry proven penetrating oil that has no equal. It quickly loosens rusted nuts and bolts, frees frozen shafts, pulleys, and other parts. Aero Kroil penetrates microscopic pores and cracks where it dissolves rust, lubricates, cleans and helps prevent further rust and corrosion by displacing moisture.
