RIVNUTS FLAT HEAD

Rivnuts™. The Rivnut™ is a one-piece internally threaded and counter bored tubular Aluminium or steel rivet that can be pulled up or headed while working entirely from one side, forming a bulge or head on the blind side. This upset is large enough to resist being pulled through metal or plastic, even under conditions of eccentric load. It overcomes the difficulty of installing brackets, handles or other attachments to tubular pieces.

Our Part Number	Grip Range	Length	Thread
