

UNDERCARRIAGE SHOCK CHORD

E-Mail: sales@asapspares.com.au

SHOCK CHORD

An endless elastic ring composed of multiple strands of natural rubber, wound into a circular skein. Braided cover is high grade yarn. Manufactured to meet specification MIL-C-5651B, Type II. Shock cord is used in landing gear to reduce shock transmitted to fuselage while landing and taxiing and on other shock mounting applications. Colour coded to insure fresh stock.

Our Part Number	Fitment, Application	Size	Test lbs	Number required	Stocked
